

RDH REMANUFACTURED POLICY**THE TERM "REMANUFACTURED": FOR RDH REPRESENTS THE FOLLOWING KEY POINTS:**

1. Frames are stripped down completely, to be sandblasted for inspection of all welds.
2. Engines are completely rebuilt by a dealer with their standard warranty.
3. Powertrain (Transmission, Torque & Axles) would be completely torn down and rebuilt according to manufacture specification.
4. Hydraulics (Pumps, Cylinders, Valves) would be torn down, inspected and repaired/or replaced as required and all hydraulic hoses would be replaced with Aeroquip.
5. Electrical would be completely rewired which includes dash and harnesses. Also new instrumentation gauges, lights, batteries, master switch, senders would be replaced.
6. We are C.W.B. Certified, therefore all welding conforms to their standards.
7. Tires would be recap tires or we can offer new tires at an additional cost.
8. All pins & bushings would be replaced and all worn bores would be linebored to manufacturer specification.
9. Fire suppression system would be to ansul specification and all hoses would be replaced with new Aeroquip red fire suppression hose.

In short all equipment remanufactured by RDH are upgraded to "Like New" condition following ISO 9001: 2000 Standards and C.W.B. W47.1 Certification.

Sincerely yours,

Rick Lemieux
President
